# 1 Liability Exclusion

Dear Customer

Our cable sets are developed according to the connection- and circuit diagrams of the corresponding car manufacturer. Before the original production the cable sets will be tested on an original car. Therefore, the integration into the car electronics will be executed according to the instructions of the manufacturer. Regarding the necessary pre-understanding and the accuracy of the presentation of texts and pictures our mounting guidelines correspond to the usual ones in car technology and car electronics. Practically, they have been proved one's worth a hundred times.

However, should there be any difficulties during the installation of our products we will be at your disposal any time for support by phone or by mail. Moreover, we offer you to execute the installation at our works in Bad Segeberg.

Costs which may arise because a third person will execute the installation of our products will not be supported by us in any case. Only if there is a mistake caused by our product we will pay the proved costs of the installation as well as the costs of the removal of the defective product. The refund of expenses will be limited to gross EUR 110,- ; we reserve the right to check the described mistake in our works in Bad Segeberg. In case of a proved reclamation the costs for dispatch for the check in our factory will be transferred to you.

According to our experience each specific factory which has the necessary diagnostic device, diagnostic software and the circuit diagrams of the manufacturer can find possible mistakes at our products within a short time. So the installation and removal including diagnostic inspection can be realised in at most 60 minutes.

We also made the experience that many specific factories cannot work with the circuit diagrams of the manufacturer, and that they cannot read usual wiring diagrams. Therefore, very easy installation works will take many hours. You will understand that we neither take the risk to find a reliable specific factory nor the financing of the training of the staff of your favoured factory.

Costs which will arise because you buy missing parts or spare parts at other suppliers will be refunded by us up to the amount of the costs which had been arisen by additional supply (saved expenses). In this case, there would be no right for refund according to the legal guarantee right as long as we have no deadline for supplementary performance or a deadline for supplementary performance has not expired.

So if you have any problems with the installation or operation of one of our products please call us, send us an email, send us the product or take your car to our factory in Bad Segeberg. We are sure to find an appropriate solution for each concern.

With best regards

Your Kufatec GmbH & Co. KG Team

## 2 Copy Right

Our installation- and removal instructions, installation plans, software and other documentation with texts or pictures are protected by copy right.

A publication or distribution of these documents is only permitted with a written approval of Kufatec GmbH & Co. KG.

## 3 General Notes

Regarding the development there has especially been paid attention to your personal safety together with the most possible operating comfort, modern design and actual product technologies.

Despite most possible accuracy in case of incorrect installation or use or in case of incorrect operating, it is possible that injuries or damages of property may arise.

Therefore, please read the operating instructions you have received carefully and completely, and keep it with you.

All articles of our production will be checked at 100% — for your safety.

We reserve the right to make technical changes which serve the progress at any time.

Before the installation or startup it may be necessary, depending on the article and purpose of use, to check the legal instructions of each country.

In case of warranty claim the device has to be sent to the seller originally packed together with the sales receipt and a detailed description of the mistake. Please consider the manufacturer's instructions for return (RMA). The legal warranty instructions are valid.

The warranty claim and also the permission for startup will expire in case of:

- unauthorised changes on the device or the accessories which have not been executed or approved by the manufacturer or its partners
- opening of the box
- repair of the device on your own
- incorrect use / no normal use / startup
- influence of force on the device (falling down, wilful damage, accident, etc.)

During the installation please consider all safety and legal instructions. The device may only be installed by trained qualified personnel or persons who are similar qualified.

**In case of installation- or function problems please reduce the search of the mistake to approx. 0,5 hours for mechanical works or 1,0 hours for electronic works.**

To avoid unnecessary additional work and expenses, please send immediately an inquiry to our technical support with the Kufatec contact form (<http://www.kufatec.de/shop/de/infocenter/>)

Please absolutely mention the following:

- car chassis number
- part number of the add-on kit
- exact description of the problem
- work steps already made

## 4 Safety instructions

The installation may only be executed by trained qualified personnel. Please execute the installations only in a condition of dead voltage. Here please separate for example the battery from the main power supply and consider the instructions of the car manufacturer.

- In order to not endanger your own driving safety please never use security relevant screws, bolts or other fixation pieces at steering, brake system or other components.
- Connect the device only at 12V wiring system voltage with ground connection to the autobody. This assembly is not allowed for the use in trucks or other cars with 24V wiring system voltage.
- Please avoid the installation of the device at positions where the driving safety or the functional efficiency of other subassembly integrated in the car are restricted.
- This module may only be used together with the following mentioned car types and models; the installation may be executed exclusively by use of the circuit points mentioned in the assembly instructions.
- Kufatec GmbH & Co. KG does not assume liability for damages which are caused by incorrect installation, the use of inapplicable circuit points or the installation into car types and -modules which are not foreseen.
- We would like to draw your attention to the fact that the module processes the data of the MOST-protocol of the car mentioned below. Therefore, during the installation of the module it will be used a model-specific complete system which we as the manufacturer of the mentioned construction line only know partly.
- Especially in case of changes within the same model line and the same year we therefore cannot guarantee the applicability of our construction line in each case. Kufatec GmbH & Co. KG does not assume liability for the applicability of our construction line with changes made by the manufacturer.
- Kufatec GmbH & Co. KG does not assume liability that the installation of the here described component has been permitted according to the guarantee instructions of particular car manufacturers. Therefore, please consider the guidelines for installation and guarantee conditions of your car manufacturer before installation.
- The manufacturer reserves the right to change components without giving reasons.
- Subject to errors and changes

## 5 Requirements for the determinable operation

**Please use the device only in its the corresponding area.**

**In case of unprofessional and untypical use, installation or modification the permission for operation and the warranty claim will expire.**

## 6 How to connect a cable to another

Figure 1: How to connect a cable to another

Table 1: How to connect a cable to another

No.	Work step	Note
1	Take the cable of the vehicle, to which you want to connect, (green marked here) and strip the insulation at one point with a suitable tool (cable stripper/cutter knife).	
2	Now take the cable of the cable set, which you want to connect, (yellow marked here) and strip the insulation at the end.	
3	Twirl the wires of the stripped cable together.	
4	Place the end of the cable you want to connect under the stripped point of the cable of the vehicle...	
5	... and wrap the cable you want to connect around the cable of the vehicle.	
6	Lastly, stick insulating tape around the connection point.	

## 7 Note Cabrio Comfort Module

### **Important note concerning the Cabrio Comfort Module**

- The module doesn't include an automatic anti-trap facility, so that the user has to pay absolutely attention that no objects or people (in particular children) are in the field of the closing zones of the folding top during the closing process. Therefore, it is essential that the user keeps the whole closing process under surveillance. If people come close to the folding top, the closing process can be stopped immediately by pressing the remote control as well as the button of the folding top in the interior again. The Kufatec GmbH & Co. KG assumes no liability for damages that result from the non-observance of these safety regulations.

## 8 Assembly Instructions

The following illustration shows the position of the individual components.

## 9 Removing side trim panel trunk

Figure 3: Removing side trim panel trunk

Table 2: Removing side trim panel trunk - instructions

No.	Work step	Note
1	Take the trunk floor out of the vehicle.	
2	Take also the polystyrene inserts and the vehicle tools out of the trunk.	
3	Remove the trunk sill protection using a trim tool by pulling it up out.	
4	Loosen the covering of the marked lashing eye on the driver's side.	
5	Loosen the screw which is located behind.	1xVZ8

Figure 4: Removing side trim panel trunk

Table 3: Removing side trim panel trunk - instructions

No.	Work step	Note
1	Loosen the side trim panel on the driver's side carefully with a trim tool, it is snapped into place with two two metal clips and hooked in at the end.	
2	Remove the marked plug from the trim panel and take the trim panel out afterwards.	

## 10 Connection Cabrio Pro Comfort Module

Figure 5: Connection Cabrio Pro Comfort Module

Table 4: Connection Cabrio Pro Comfort Module - instructions

No.	Work step	Note
1	Loosen the holding clamp of the folding top control unit and pull it out carefully.	
2	Loosen the plug C out of the control unit and remove the brown plug housing. It is no longer required, but keep it for a possible removal.	
3	Connect the wire which is marked with steady plus also to the red/violet cable to PIN 3 of the plug A.	
4	Connect the ground cable also to the marked ground spot.	10er socket

Figure 6: Connection Cabrio Pro Comfort Module

Table 5: Connection Cabrio Pro Comfort Module - instructions

No.	Work step	Note
1	Plug the plug of our cable set according to the big inscription on the plug which was removed out of the plug-in position C (big 1 on PIN 1 and big 10 on PIN 10 of the vehicle's plug).	
2	Plug the red plug of our cable set in the plug-in position C of the control unit.	
3	Connect our module with the cable set.	
4	Reinsert the control unit and place the module at an appropriate position.	

## 11 Operation instructions

Figure 7: Operation instructions

Table 6: Operation instructions

No.	Note
1	You activate and accordingly deactivate the features of the Cabrio Comfort Module by pressing the control button for the wing mirrors in the respective direction for about 5 seconds. For this, the control button has to be in the basic position. The warning light signals the deactivation of the respective feature by flashing up once and the activation by flashing up twice. You find an overview of the individual Comfort features below.
↑	<b>Activate/deactivate the indicator mode</b> - The indicators of the mirrors will flash during the opening and closing process (only by using the remote control).
→	<b>Activate/deactivate the interior button</b> - You switch the Comfort control via standard button of the folding top (2) in the interior on or off. - By pressing the interior button for about 2 seconds, the folding top closes and opens automatically.
←	<b>Activate/deactivate the remote control</b> - You switch the Comfort control via standard remote control (3) on or off. - By pressing the opening or closing button 3 times (one time every second), the folding top opens or closes automatically. - To stop the closing or opening process, please press the opposite button on the remote control. By pressing the button of the desired direction again, the process will be continued.
4	The standard feature of the opening and closing process while driving, up to a speed of 50 km/h, remains.
